Do you know what kind of wipes you are using to clean and disinfect? It’s important to know what’s in them. Some wipes are only approved for bacteria and don’t work well on viruses. Wipes with “disinfectant” on the label should kill bacteria, viruses, and mold. For a list of approved disinfectants, especially those which are effective against COVID19, visit the Environmental Protection Agency (EPA) website at: https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2-covid-19
